Professional Experience

Portfolio Work

October 2025 - Present

- Created sdf2stl.saej.in to design and 3D print signed distance functions
- Applied data structures and algorithms to word games with words.saej.in
- Answered "Who are my follows following?" with followsfollows.saej.in

Full-Stack Engineer

Agrippa Technology – Las Vegas, Nevada

May 2025 - October 2025

- Orchestrated a migration to a serverless architecture, reducing hosting costs
- Implemented row-level security for safe agentic frontend development
- Championed sustainable software development and long-term planning

Independent Software Consultant

Power Law Systems – Fort Wayne, Indiana

March 2024 - May 2025

- Parametrically generated individualized placards for 3D printing
- Architected a user-friendly, deeply integrated live website content editor
- Automated source code formatting, quality checks, and deployment

Assistant Research Programmer

Center for Research Computing – University of Notre Dame

July 2019 - April 2021

- Empowered client to resolve issues independently with expressive tools
- Designed dynamic visualizations for instant feedback
- Organized lightning talks to facilitate interdepartmental knowledge transfer

Honors Research Project

Computer Graphics and Visualization Lab – Purdue University

Jan 2019 - May 2019

- Created automatic statistics generator that integrated Python and Excel
- Contributed to an Android app, using camera and networking APIs

Undergraduate Research Assistant

Center for Research Computing – University of Notre Dame

May 2017 - Aug 2018

- Developed Android app used for machine learning data acquisition
- Programmatically generated insightful visualizations

Education

B.S. in Computer Science Honors; Minors in Mathematics & Psychology

Purdue University – West Lafayette, IN

May 2019

- Overall GPA: 3.2; Major GPA: 3.7
- Intro. Computer Animation: Created color-blind gaming accessibility utility
- Industrial and Organizational Psych.: positive work environments

Technical Skills

Tools: Bash, C, C++, C#, Docker, Git, GLSL, Java, JavaScript, Linux, Node.js, OpenSCAD, Postgres, Python, React, SQL, Supabase, TypeScript, Unity, WebGL, 3D Printing

Techniques: Agentic, Agile, Functional, Object-Oriented, Streaming, Literate, Meta
